

Forensic Video Enhancement Software for Law Enforcement

Ikena Forensic Product Overview

Ikena Forensic equips analysts with tools for enhancing video from any source including body cameras, security cams and mobile phones. Our software allows you to quickly identify important details like faces, license plates and the make and model of cars to produce forensically-valid evidence for court. Our GPU-accelerated technology makes importing, rendering enhancements, and exporting your results faster and easier than other software.

Trusted by organizations like the U.S. Secret Service, NCIS, Scotland Yard, and NYPD, our Windows-based solution does not require any special hardware or time-consuming training. Enhancing your video can be achieved in 3 simple steps: import, enhance and export.

About Us

MotionDSP is a leader in advanced image processing software that helps police and organizations extract critical information from video. Our software is used by the U.S. Secret Service, Scotland Yard, NCIS and many other agencies around the world.

Ikena Forensic's Capabilities

Over the **past decade**, we have perfected several patented algorithms to help you **get the most from your video**.

Super Resolution

Patented algorithm combines multiple frames of video to recover details and remove noise.

Deinterlacing

Recover 2x the resolution with our patented kernel regression deinterlacing.

Light & Contrast

Helps you uncover details that you may otherwise miss in your video.

Stabilization

Stabilizes shaky video from the most extreme cases with multi-frame stabilization.

3 Simple Steps to Enhance Your Video

1. Import Video from any Source

Easily import video from body cams, dash cams, CCTV systems, security cameras and phones.

2. One-Click Video Enhancement

Ikena Forensic's intuitive user interface includes one-click auto setting presets and fine tuning controls.

3. Export File for Evidence in Court

Export enhanced snapshots, videos and auto-generated reports that are ready to present in court as evidence.

Identify Faces

Read License Plates
